SPECIAL SESSION ON EU PROJECTS WITHIN ACM INTERNATIONAL CONFERENCE ON COMPUTING FRONTIERS 2021 (CF'21)

www.computingfrontiers.org

May 11-13, 2021 - Virtual Conference

CF'21 will feature a special session focused on EU projects addressing the topics of interest of the conference, including novel computational models and algorithms, new application paradigms, computer architecture (from embedded to HPC systems), computing hardware, memory technologies, networks, storage solutions, compilers, and environments.

The goal of this session is to provide a venue for increasing the visibility of current research and development EU projects and creating a forum for collaboration. The special session is also an opportunity to discuss future research projects and search for partnerships.

SUBMISSIONS

EU Project Coordinators are invited to submit an abstract (up to 2 pages, free format) presenting the goals of the project, recent achievements, and lessons learned from the project. The abstracts should be sent by email to the session co-chairs by **January 28th, 2021**.

The accepted abstracts are then invited to prepare a 6-page paper by **March 15th, 2021**, according to the submission instructions of CF'21.

The deadline of the camera-ready submission is **March 25th, 2021**.
The accepted abstracts or optional 6-page papers will be published in the ACM digital library.
